A.A.S. HUMAN SERVICES

The Human Services (HUS) Program offers a career-track degree that is designed to prepare students for entry-level employment within a variety of helping professions. This curriculum provides an academic and experiential foundation for skill development. Core studies provide the student with opportunity to practice an essential set of generalist helping skills. Areas of focus include: knowledge and practice of empathic listening, client interviewing and problem solving, advocating for clients within organizational structures, responding in crisis, and attending to multicultural perspectives in case management. In their final semester, students enroll in an internship that serves as a capstone to their studies. Internships in child advocacy, family assistance, chemical dependency intervention, and gerontology are just a few of the areas where HUS students have successfully demonstrated professional skill.
