

# Contact Tracing and Infection Control

## PROGRAM DETAILS

### Increase Your Professional Value

When it comes to career training, you'll find a lot of posers out there.

Con artists that'll try to impress you with fancy hyperbole. But through all the noise, the distinct sound of success can be heard. Your success. All it takes is a little push. A nudge in the right direction—and your whole life could change. New doors opened. New worlds discovered. New opportunities explored. With CareerStep, you'll learn skills that will help you get your foot in the door, upgrade your resume, and advance your career.

### Boost Your Knowledge

COVID-19 has changed the way we live—and these changes have ripple effects that will continue to permeate our lives long after we return to our "normal" routines. We've already faced mass quarantines and world-wide lockdowns. We've even stopped going to movies and eating at restaurants. It's been a rough road so far. But, here's the silver lining: Contact tracing could be what frees us from the grasp of the coronavirus. It's a popular method of containment that's already helped flatten the curve. But for this to work long-term, we need more qualified healthcare professionals with the proper training—training that isn't easy to find. That's where CareerStep comes in.

This course prepares Learners to earn the **Certificate of Contact Tracing Proficiency, Infection Control, and HIPAA in the Workforce** credential.

### Learn Your Way (From Home)

With online training, you can absorb more knowledge and learn more skills—fast.

- Study on a schedule that fits your life
- Progress at a pace that matches your learning style
- Adjust the time and effort you devote to your coursework each day

### Receive Coaching and Guidance

When you train with CareerStep, we back you every step of the way—from enrollment through course completion.

- Learner support
- Technical support
- coursework each day

### Get Certified
